Staff Product Manager, AI & Data Privacy | Founder, Custodia Privacy Consulting

Strategic Staff Product Manager specializing in **SaaS Security, Governance, and Compliance**. Adept at defining **product vision and strategy**, launching impactful **0-to-1 products**, and scaling adoption in demanding enterprise markets (\$7M+ portfolio ARR). Proven ability leading cross-functional engineering and GTM teams to solve complex **identity, access, privacy (GDPR/CCPA), and integration** problems, ultimately enhancing developer velocity and trust. Founder of an AI Governance consultancy.

WORK EXPERIENCE

Transcend - Series B startup - 100+ employees

Staff Product Manager - Data Privacy and Governance, AI products

Remote - Perugia, Italy

June 2023 - Current

- Owned and scaled a portfolio of 3 core data privacy and governance products (Preference Management, DSR Automation, Data Inventory) to over **\$7M in ARR** by expanding feature sets for enterprise use cases and optimizing onboarding flows.
- Pioneered Preference Management from 0-to-1, defining the **product strategy** to meet enterprise **consent and access control** needs, securing flagship customers (Universal Music Group, Costco, Notion) with an average contract value of **\$1.5M**.
- Successfully launched the 0-to-1 Assessments product, identifying market requirements for **compliance workflows** and securing 10+ large enterprise customers (incl. Reddit, Informa) within the first year through targeted validation and iterative development.
- Led the strategic rebuild of the Data Subject Request (DSR) Automation product, focusing on usability and **enterprise identity verification/integration**, resulting in a **50% increase in NPS**, a 30% reduction in conversion time, and unlocking larger market segments.
- Managed and mentored 1 Product Manager, guiding roadmap development and execution for the Privacy, Security and Vendor Assessments product line.
- Led full lifecycle product development across 3 dedicated Engineering teams (approx. 15-20 engineers), defining requirements (PRDs), creating wireframes (Figma), planning milestones, validating prototypes, running A/B tests, and authoring documentation.
- Collaborated closely with Go-To-Market and Security leadership, influencing technical architecture decisions (TDDs) to ensure scalability and translating complex security concepts for GTM activities.
- Partnered directly with enterprise customers and their InfoSec/Compliance teams to diagnose complex **security and governance challenges**, translating needs into intuitive product features that enhanced trust, adoption, and **unblocked key strategic deals**.

Custodia Privacy Consulting SAGL

Founder & Principal Consultant - AI Governance and Data Privacy

Remote - Perugia, Italy

August 2024 - Current

- Established Custodia Privacy Consulting, providing expert **AI Governance and Data Privacy** solutions to technology companies navigating complex **US and EU regulations (e.g., GDPR)**.
 - Developed and delivered tailored consulting services, including AI impact assessments and **data mapping/ROPA reporting**, enabling clients to implement **responsible AI practices and mitigate regulatory risks**.
-

LiveRamp - Global, publicly traded, enterprise - 1500+ employees
Lead Product Manager - Data Privacy, Identity, and Data Governance

Remote - Cleveland, OH
September 2021 - June 2023

- Led multiple global, cross-functional teams (Engineering, Ops, Legal) via influence to architect and deliver scalable API-based **identity management** and **data privacy** pipelines across Americas, EMEA, and APAC, significantly enhancing **governance posture and reducing audit completion times by ~20%**.
- Drove the strategic consolidation of 71 disparate team processes into a unified Pub/Sub-based system, improving data processing speeds by 50% (reducing average cycle time by 1 week) and measurably lowering the company's **compliance risk profile**.
- Developed **identity resolution** API products and regionalized data stores, ensuring **regulatory compliance (GDPR, CCPA)** and enabling **faster customer data integrations** while improving underlying database performance by 25%.

Sherwin-Williams - Global, publicly traded - 44000+ employees
Sr. Digital Product Manager - CBG Division

Remote - Cleveland, OH
March 2021 - September 2021

- Managed roadmap and delivery for core e-commerce platform features used by millions, coordinating dependencies across multiple large engineering and marketing divisions.
- Contributed to digital transformation initiatives by defining requirements for integrating new vendor solutions into the existing enterprise architecture.

Enklu - Seed stage startup - employee #6
Sr. Product Manager - B2B Augmented Reality Products

San Francisco, CA
October 2018 - March 2021

- Launched the company's first B2B Augmented Reality SaaS platform from 0-to-1 in an ambiguous market, defining the initial value proposition, roadmap, and pricing strategy.
- Secured and managed relationships with initial enterprise pilot customers, gathering critical feedback to iterate on the product and inform GTM strategy in a lean startup environment (employee #6).

SKILLS & INTERESTS

- **Product Management:** Full-stack Product Development, **Security Product Strategy, Roadmap Development & Prioritization**, User-Centric Design (UCD), **Enterprise SaaS, B2B Product Launches (0-to-1), Identity & Access Management (IAM) Concepts, Compliance & Governance Frameworks (GDPR, CCPA, SOC 2, ISO 27001)**, JTBD, Agile SDLC, KPI Tracking & Analytics, A/B Testing, Customer Interviews & Validation, Wireframing & Prototyping, Product Operations Improvement.
