custodia-privacy.com | [Portfolio](#) | Dual US / Swiss Citizenship

Technically-focused product leader with 8+ years in enterprise SaaS, running a **\$20M+ ARR portfolio** of B2B SaaS data privacy and AI governance products, with 2 PM reports and ~20 engineers across 4 product lines (Workflows, Preference Management, Consent Management, Integrations). Proven track record shipping complex **0→1** products in **AI, Adtech, and Privacy Tech** - including the fastest-growing product in Transcend's history - and scaling them to enterprise revenue with flagship customers (OpenAI, Costco, Yum! Brands, Universal Music Group, Notion). Works hands-on with engineering on architecture and strategic enterprise integrations, applying first-principles thinking to turn ambiguous regulation and complex user needs into clear, scalable workflows.

WORK EXPERIENCE

[Transcend](#) - Series B startup, 100+ employees

Remote - Cleveland, OH & Perugia, IT

Director of Product - Workflows, Preference, Consent, Integrations

January 2026 – Current

- Promoted from Staff PM to lead a **\$20M+ ARR portfolio of 4 products** (Workflows, Preference Management, Consent Management, Integrations) with 2 **PM reports** and ~20 engineers across 4 dedicated engineering teams.
- Defining cross-product strategy spanning consent capture, preference management, downstream workflow automation, and strategic enterprise integrations - positioning the portfolio as a unified compliance and customer-trust layer for enterprise.
- Coaching PMs on roadmap development, discovery, and execution; setting OKRs, hiring rubrics, and review cadences for the product line.
- Partnering with GTM, engineering, and design leadership on pricing, packaging, and architectural decisions across the privacy product portfolio.

Staff Product Manager - Data Privacy and Governance, AI products

June 2023 – January 2026

- Built and scaled a portfolio of 4 B2B SaaS data privacy and governance products (Preference Management, DSR Automation, Assessments, Inventory) **from inception to \$10M+ ARR** for enterprise use cases - laying the foundation for the current \$20M+ portfolio.
- Pioneered Preference Management from **0-to-1**, securing flagship customers (Yum! Brands, OpenAI, Universal Music Group, Costco, Notion) at an average ACV of **\$1.5M** - the **fastest-growing product** in company history.
- Launched the 0-to-1 Assessments product, identifying market requirements for **compliance workflows** and securing 10+ enterprise customers (incl. Reddit, Informa) within the first year.
- Led the strategic rebuild of the DSR Automation product through **PLG**, focusing on TTV and feature adoption - **50% increase in NPS, 70% reduction in onboarding time**, and unlocking larger market segments through simplified dynamic configurations.
- Led full-lifecycle product development across 3 engineering teams (15 engineers): discovery, requirements, customer interviews, wireframes (Figma), milestone planning, prototype validation, A/B tests, release rollouts, and documentation.
- Built cross-functional automations (integrated feedback forms, automated Linear issue creation, automated product enablement) to drastically improve product operations across the company.

[Custodia Privacy Consulting SAGL](#)

Remote - Perugia, Italy

Founder & Principal Consultant - AI Governance and Data Privacy

August 2024 – Current

- Established Custodia (custodia-privacy.com), providing **AI Governance and Data Privacy** advisory to technology companies navigating complex US and EU regulations (e.g., EU AI Act).
- Shipped client-facing application at app.custodia-privacy.com delivering AI impact assessments, ML prediction systems, and data mapping / ROPA reporting workflows - productizing the consulting offer.

- Building and growing [Pagebolt.dev](#), an automated AI Demo recorder with voice narration and page annotation.
- Building [Custodia Sentinel](#) - a plug-and-play, airgapped, RAG-enabled private AI targeting the Swiss enterprise market, where data residency and confidentiality block off-the-shelf LLMs.

[LiveRamp](#) - Global, publicly traded enterprise, 1500+ employees
Lead Product Manager - Data Privacy, Identity, and Data Governance

*Remote - Cleveland, OH
 September 2021 – June 2023*

- Led global, cross-functional teams (Engineering, Ops, Legal) to architect and deliver scalable API-based **identity management** and **data privacy** pipelines across Americas, EMEA, and APAC, **reducing audit completion times by ~20%**.
- Drove the consolidation of 71 disparate team processes into a unified async Pub/Sub-based system, **improving data processing speeds by 50%** (cutting average cycle time by a week) and measurably lowering the company's compliance risk profile.
- Developed **identity resolution** API products and regionalized data stores, ensuring regulatory compliance and enabling faster customer data integrations while improving database performance by 25%.

[Sherwin-Williams](#) - Global, publicly traded, 44,000+ employees
Sr. Digital Product Manager - CBG Division

*Remote - Cleveland, OH
 March 2021 – September 2021*

- Managed roadmap and delivery for core e-commerce platform features used by millions, coordinating dependencies across multiple engineering and marketing divisions.
- Contributed to digital transformation initiatives by defining requirements for integrating new vendor solutions into the existing enterprise architecture.

[Enklu](#) - Seed-stage startup, employee #6
Sr. Product Manager - B2B Augmented Reality Products

*San Francisco, CA
 October 2018 – March 2021*

- Launched the company's first B2B Augmented Reality SaaS platform from 0-to-1 in an ambiguous market, defining the initial value proposition, roadmap, and pricing strategy.
- Secured and managed relationships with initial enterprise pilot customers, gathering critical feedback to iterate on the product and inform GTM strategy in a lean startup environment.

SIDE PROJECTS

- **Pagebolt** ([pagebolt.dev](#)) - Bootstrapped B2B web application; sole product owner driving discovery, design, and release. Currently in a structured user-research phase, validating early enterprise use cases and refining the early-customer onboarding experience.
- **Custodia Sentinel** ([sentinel.custodia-privacy.com](#)) - Airgapped, RAG-enabled private AI for Swiss enterprise; leading architecture, model selection, and product decisions end-to-end.
- **Custodia App** ([app.custodia-privacy.com](#)) - Productized AI impact assessments and ROPA reporting workflows for privacy and AI governance teams.

SKILLS

Product Management: Product-Led Growth (PLG), First-Principles Thinking, Experiment Design & Validation, Tech-Enabled Services, Service Design, Enterprise SaaS, 0→1 Product Launches, Strategic Enterprise & API Integrations, AI/LLM Product (RAG, Agents, MCP), Roadmap Development, User-Centric Design (UCD), Identity & Access Management (IAM), Compliance Frameworks (GDPR, CCPA, ISO 27001), JTBD, Agile SDLC, KPI Tracking & Analytics, Customer Research, A/B Testing, Wireframing (Figma).

Leadership: People Management (3 PMs), Cross-Functional Team Leadership, Stakeholder Management, Mentorship, Hiring & Coaching.

Specialties: UX in Regulated Environments, Data Privacy & AI Governance, Scaling Advisory into Productized Services.

EDUCATION

University of California, Berkeley *Berkeley, CA*
B.A. Rhetoric - GPA 3.9, Highest Honors and Distinction - 2014 – 2018
